

RETRO-FIT SYSTEM FOR E/ONE® GRINDER PACKAGES

**Model: F(H)C2-21C-RE/REX
F(H)G2-21C-RE/REX
FNG2-21C-RE/REX**

This Retro-Fit system is a fully assembled, ready drop in package to replace exiting E/One® GP200, GP2000 and Extreme Systems. The newly up-graded design gives you all the power of FQ's three grinder pumps.

Improved features include an easily adjusted goose neck discharge, camlock cover system and highmount junction/control box that elevates it above the potential flood level in the event of a power failure. E/One® original equipment panels remain fully operational (including the manual over-ride switch) when connected to the FQ unit.

KEY FEATURES:

- FQ's 2 hp grinder pump -- Available in three models
- Superior pump performance -- More flow and high head
- Fully assembled -- Simple & Quick install
- Operates with existing control panel, no modifications to existing system
- Quick-connector with 10' cable lead plugs into existing E/One connector. Both old style and new hooded connectors available
- IP68 waterproof junction box contains motor contactor and terminal strip
- Stainless steel piping and discharge elbow is easily adjusted for proper engagement to the receiver
- Includes pressure floats, piping and replacement cover
